

The SECME Summer Institute Experience has an impact that will follow you when you walk out the door...

SECME's modules are not presented as isolated activities. All modules are aligned to national standards. Part of the Institute Experience are opportunities to meet with state-level Department of Education leaders to further align the SECME Institute module offerings to your states' standards – and then time to “drill down” to assure your SECME program meets local needs. Summer Institute Experience participants leave understanding STEM discipline concepts, methodology, and pedagogy – and the importance of integrating hands-on, standards-based learning into student instruction and activities!
