

***The SECME Summer Institute Experience does make a difference...***

A survey of '09 SECME Summer Institute attendees showed 100% of our respondents were “very satisfied” or “satisfied” with the Institute, and 98% would recommend a peer attend in the future. Past Institute participants have said it best:

- “It’s not just about STEM Education – SECME’s about understanding the impact of inquiry-based instruction and learning...”
- “It’s not just about teaching a concept or student competition participation – it’s about ‘doing it’ – and then it’s not just about ‘doing it’ – it’s about the purpose, the how, the why...”
- It’s not just about teaching kids – SECME is about embracing diversity and realizing that we don’t know where genius resides – we just know it’s sitting somewhere in our classrooms waiting to be discovered, to be ignited, and to be nurtured...”
